TakeMeter – Planning Document

Project: AI201 Project 3
Community: r/nba
Student: Satya

Community

I chose r/nba because it is one of the most active sports communities on Reddit, with thousands of posts and comments daily. NBA discourse varies enormously in quality — some posts build structured arguments using advanced statistics and historical comparisons, while others are pure emotional reactions to games or bold unsupported opinions. This makes it an ideal fit for a classification task because the distinction between evidence-based argument and assertion is something community members actively recognize and debate.
